PROFILE OVERVIEW

Computer Science undergraduate at Informatics Institute of Technology (University of Westminster) with a strong interest in **full-stack web application development** and **software engineering**. Experienced in building responsive web applications and RESTful APIs through academic projects, with strong problem-solving, analytical, and teamwork skills. Eager to apply technical knowledge in real-world environments as an intern and continuously develop expertise in modern web technologies.

SKILLS

Technical Skills

- Frontend - HTML, CSS, JavaScript, React
- Languages - Python, Java, PHP, JavaScript
- Databases - PostgreSQL, MySQL, MongoDB
- Mobile Development - Dart (Flutter)
- Tools & Design - Git, GitHub, NetBeans, Postman, Canva, Figma, XAMPP, Netlify
- Methodologies - Agile / Scrum, OOP, UML

Soft Skills

- **Leadership & Teamwork:** Collaborated within Agile development teams for university group projects, ensuring smooth communication, sprint planning, and successful project delivery.
- **Communication:** Skilled in technical documentation, presentation of system architectures, and aligning cross-functional project goals.
- **Problem Solving Skills:** Experienced in full-stack debugging, system analysis, and translating complex requirements into functioning features.
- **Time Management:** Successfully balanced demanding academic modules, group project milestones, and hands-on software development tasks simultaneously.

PROJECTS

Software Development Group Project | KidCloud Smart Child Safety System 2025 - 2026

- Developed an IoT-based child safety system featuring a smart wearable device integrated with a Flutter mobile application for real-time child monitoring.
- Implemented GPS-based live location tracking, safe-route monitoring, geofencing, and instant alerts using the Google Maps API to notify parents when a child deviates from predefined safe zones.
- Designed and integrated RESTful APIs with a Python FastAPI backend and PostgreSQL database to enable secure communication between the mobile application and IoT device.
- Collaborated in a six-member Agile development team, contributing to UI/UX design, frontend development, system analysis, testing, documentation, and Git-based version control.

Technologies: Flutter, Dart, Python, FastAPI, PostgreSQL, Google Maps API, REST APIs, ESP32, GPS Module, Git, GitHub, Agile, Figma

Smart Campus REST API | Java, JAX-RS

2026

- Developed a RESTful Smart Campus API for managing rooms, sensors, and sensor readings using Java and JAX-RS.
- Implemented CRUD operations, nested resources, query-based filtering, custom exception handling, and request/response logging.
- Applied RESTful architecture principles, JSON-based communication, and API testing using Postman while maintaining data integrity through validation and business rules.

Technologies: Java, JAX-RS (Jersey), Maven, RESTful APIs, JSON, Postman, Git, GitHub

Estate Agent Property Search SPA | React.js

2025

- Developed a responsive React-based property search application with advanced filtering, property galleries, favourites management, and dynamic property detail pages.
- Implemented reusable components, client-side state management, responsive UI design, and Jest-based testing.
- Utilized Git/GitHub for version control and deployed the application on Netlify.

Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, React Router, Jest, Git, GitHub, Netlify

Life Below Water Website

2025

- Designed and developed a web page focusing on Life Below Water (UN SDG 14).
- Architected the user flow, sitemap, and form validation mechanisms to enhance user experience and ensure clean data entry.

Technologies: HTML, CSS, JavaScript

Traffic Management Simulation

2025

- Developed a simple traffic management simulation system as part of my university coursework.
- Implemented core features like vehicle movement logic, rule validation and UI interactions.

Technologies: Python, Object-Oriented Programming

EDUCATION

BSc (Hons) in Computer Science University of Westminster affiliated with IIT

2024 - 2028

Modules: level 5 - Software Development Group Project, Object - Oriented Programming, Database Systems, Client Server Architecture, Advanced Client Side Development, Server Side Web Development

Modules: level 4 - Software Development, Mathematics for Computing, Web Design and Development, Computer System Fundamentals, Trends in Computer Science

Informatics Institute of Technology

2023 - 2024

- Foundation Certificate in Higher Education

Government Science College - Matale

2016 - 2020

- G.C.E Ordinary Level (2017) - Nine “A” Passes
- G.C.E Advanced Level (2020) - Two “S” Passes in Biological Science Stream
